A: Autodesk, 3ds Max, Maya, Revit, Powerpoint, Lightwave, Modeling - depending on which version you're using - you will need to generate a license key. You don't state which version of the software you're using. Version 6 of the products are more "difficult" to generate the keys for, and from a thorough scan of the internet, I can't find any major changes in the generation process. Social Media Dendreon Corporation (NASDAQ: DNDN) today announced that the U.S. Food

and Drug Administration approved the Company's dendritic cell vaccine DCVax™, which is a personalized cancer vaccine designed to treat patients with hormone-refractory prostate cancer. With more than 1.5 million men diagnosed with prostate cancer in 2012, DCVax is one of the most important medicines in development for this population. Prostate cancer is the most common non-cutaneous cancer in American men, and is second only to lung cancer as a cause of cancer-related deaths. Approximately 185,000 new cases of prostate cancer are diagnosed and nearly 30,000 men die from prostate cancer each year. However, it has been shown that more than 80% of men who are diagnosed with localized disease will survive more than 10 years with watchful waiting, radiation therapy and hormone therapy. This survival rate falls to approximately 40% if hormone therapy fails. According to the American Cancer Society, the survival rate for patients with metastatic prostate cancer is about 10 to 20 percent.

"We're extremely excited about this important milestone for DCVax," said Dennis J. Burke, Ph.D., chief medical officer and co-founder of Dendreon. "We will be partnering with our clinical collaborators to further investigate DCVax in clinical trials and we look forward to conducting the pivotal pivotal Phase 3 clinical trial currently
