Portable Directory Lister Crack [2022]

Portable Directory Lister Cracked 2022 Latest Version is an Windows system utility that allows you to view a list of files and folders within selected directories. The program can be used by software professionals to find out which subdirectories contain executable files

on the hard disk. Additionally, it is possible to sort directories according to any field such as date, size or name. The tool also has a few options that let you use a different background color for each directory, customize the header font and background as well as enable rich text support. As far as configuration is concerned, users can individually define which fields they want to see, sort, and so on. By default, the program sorts the directory listings by name, size, time and type of files. The directory tool also lets you either print the results to a text document or export them to a variety of different formats, including HTML (similar to the listings on the

web) and CSV (spreadsheet format). It has a light footprint on both system resources and disk space, and it is extremely responsive. In addition to that, Portable Directory Lister Crack can be moved and run on a USB flash drive, USB memory stick or external hard drive. This is useful when you need to access the software from anywhere without installing it. Another major drawback of the program is that it has not been updated for years. However, the interface and all of its functionality are quite solid, and it still serves its purpose well. ... Directory Lister: This is my first time to
buy program not from software
company like forever or perhaps it first
time to save much money. I can afford
with this program after-sale support
because it is freeware. Very easy to use,
the customization options make
directory listing very user friendly. I
sometimes use this app to verify child
directories of company locations.

Another nice feature is the ability to move it to a usb pen drive easily.

Portable Directory Lister is a freeware. It is light on resources and has a fast response time. It is a simple but powerful utility that shows you the folder structure of one or more selected directories. It can be used by both experienced and inexperienced users alike. It shows you the contents of directories (and optionally all subdirectories) in an easy-to-read layout. All you have to do is select one or more locations, optionally include subdirectories and then save the listing to a plain text document (HTML, TXT, CSV and others). It displays the list of

files and/or subdirectories in a fixed layout (only a few customizable fields are available), with clickable items showing the detailed information (name, size, date, attributes, and so on). It displays the chosen fields in a color-matched layout. Portable Directory Lister is very light on system resources (CPU and memory). It creates no issues to the OS, and the speed of the program is quite good. For advanced users, it comes with a set of options (configurable on the fly) that enable you to customize the look of the output. You can select which fields you want to see in the listing and apply colors for the background, header and directory font

and background. Portable Directory Lister Version History: Version 1.0.0 Added new add-on feature called Portable Directory Lister Portfolio. Version 1.2.0 Improved the performance of directory listings. Eliminated invalid characters in the file name. Version 1.3.0 Improved the stability of the application. Added an improved version of the Portable Directory Lister Portfolio. Version 1.4.0 Improved stability of Portable Directory Lister. Revised the settings and dialog boxes. Version 1.5.0 Added the ability to save listings with more than 50,000 files. Version 1.5.1 Improved the stability of the application. Version 1.5.2 Improved

performance of Portable Directory Lister. Version 1.5.3 Improved the stability of Portable Directory Lister. Version 1.5.4 Improved the performance of Portable Directory Lister. Version 1.5.5 Improved the stability of Portable Directory Lister. Version 1.5.6 Improved the functionality of the application. Version 1.5.7 Improved the stability of Portable Directory

What's New in the Portable Directory Lister?

Portable Directory Lister can be used as a backup tool or a portable directory browser, especially if you are looking for a Windows app to track down free space and find duplicate files. It has a special

ability to sort files by the size of a drive or specific file attributes, as well as get an icon with a drive name in order to locate a drive in the network. Being a net app, you can also have the software display the contents of web pages in a special format, and export all of the items you want into a text document. Even so, you may want to improve some advanced settings before creating your net directory folder. In this respect, Portable Directory Lister offers some unique features, such as displaying subfolders at the bottom of the list, without including them in a separate tab. Portable Directory Lister Specifications:
Language: English File format: Unicode

text files, including: TXT, HTML, CSV, ZIP or 7ZIP System Requirements: Windows® 2000 or later, Windows 7, Windows 8 and so on About Portable Directory Lister 5 Portable Directory Lister is a straightforward utility whose main functionality focuses on displaying all containing files of one or more selected directories. It can be used by all types of individuals, whether they are experienced in software tools or not. As the name says, this is a portable app. In other words, Portable Directory Lister does not require installation, hence you can extract the program files to any location on the hard disk and access the executable immediately. It is also

possible to move the program to a USB flash disk or similar storage unit, allowing you to run it on any workstation with minimum effort. Plus, the Windows Registry does not get entry updates, and leftover files are not kept on the hard disk after removal. The interface of Portable Directory Lister is made from a regular-sized window with an Explorer-based folder structure, where you can easily navigate directories on your computer. All you have to do is select one or more locations, optionally include subdirectories, and save the listing to a plain text document (TXT, HTML or CSV format). However, numerous options are available for advanced users

concerning the listing configuration. Thus, you can select which fields to include (e.g. directory name, time, number, attributes), sort folders by various criteria (e.g. name, extension), and others.
